

AN EASY iVMS STATION

BLAZER EXPRESS

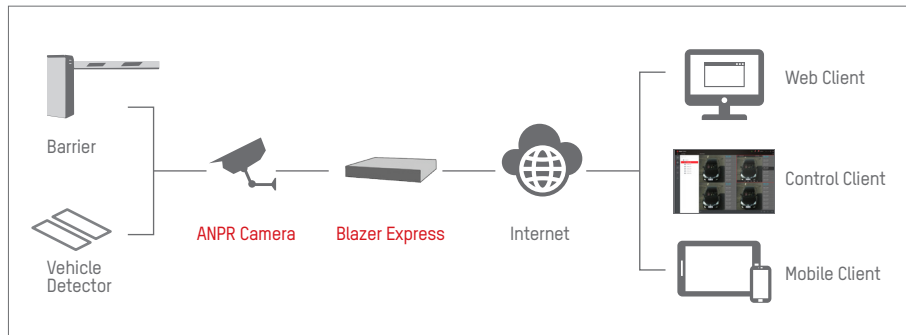

Blazer Express

The Blazer Express is an intelligent video management station that comes preinstalled with an operating system and outstanding iVMS software, with models supporting 16 or 32 network cameras. Featuring a high-speed SSD, PoE support, and included storage, and more importantly, with revolutionary alarm management, automatic number plate recognition, and people-counting function, Blazer Express provides an efficient and easy one-stop solution for video surveillance implementation. Use the Blazer Express to powerfully manage applications from small retail stores to a complex surveillance installation across multiple sites.

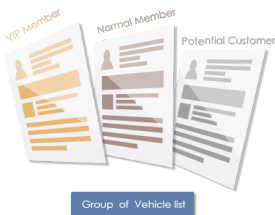

An Easy ANPR Solution

Capturing high-definition footage of vehicles is critical for business operations at locations such as gas stations and shopping areas. Such video is crucial for post-event investigation. Hikvision provides an easy and economic ANPR solution for this essential application.

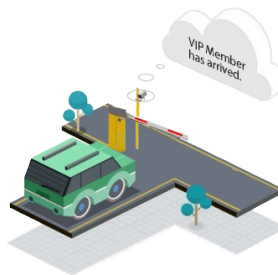

ANPR Cameras – Hikvision cameras that feature ANPR functions recognize VIP vehicles and automatically allow entry.

The Blazer Express iVMS station with ANPR module facilitates entrance management and empowers searches for relevant video footage.

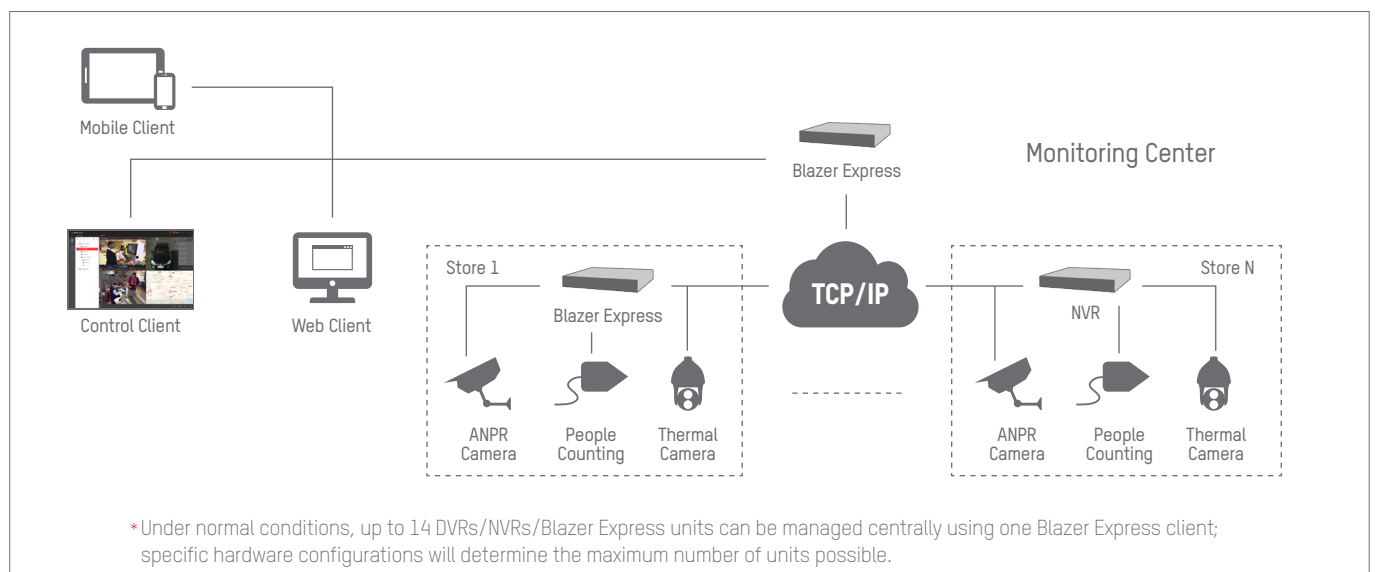

Manage authorizations of license plate numbers in groups

Identify VIP customer vehicles and automatically grant entry

An Easy Small-to-Medium Size Chain Store Management Solution

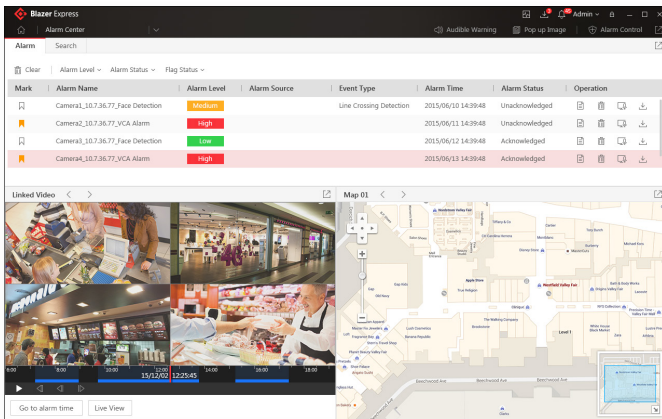

From a single store to multiple locations, Blazer Express provides easy and effective site management. When a retail business grows into a couple of stores, Blazer Express also enables central management for all stores through the same client interface. Furthermore, Blazer Express manages Hikvision DVRs and NVRs, providing another cost effective avenue to intelligent central management.

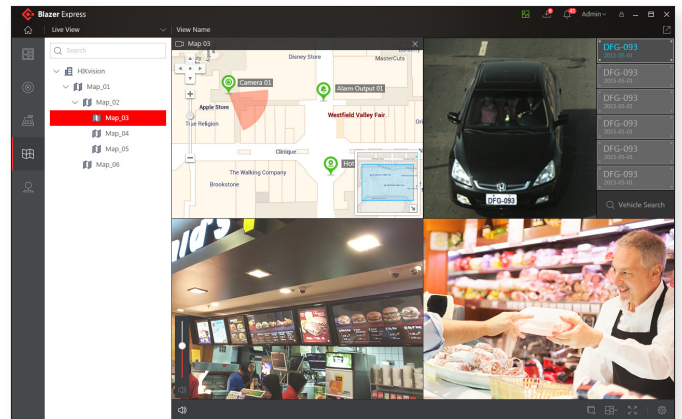

* Under normal conditions, up to 14 DVRs/NVRs/Blazer Express units can be managed centrally using one Blazer Express client; specific hardware configurations will determine the maximum number of units possible.

Easy to Set Up and Use

- Preinstalled operating system, pre-activated iVMS, and POE support makes Blazer plug-and-play ready
- Interactive live-view E-map provides system awareness and easy visual identification of events
- Simple alarm management interface makes for convenient alarm identification and handling – alarm information, real-time video, and physical location are all displayed on one screen
- One common and intuitive interface for customers to manage Hikvision DVRs/NVRs and Blazer Express via Blazer Express Client
- System Health-Check function helps monitor service, storage, and camera running status, and provides assurance of system maintenance

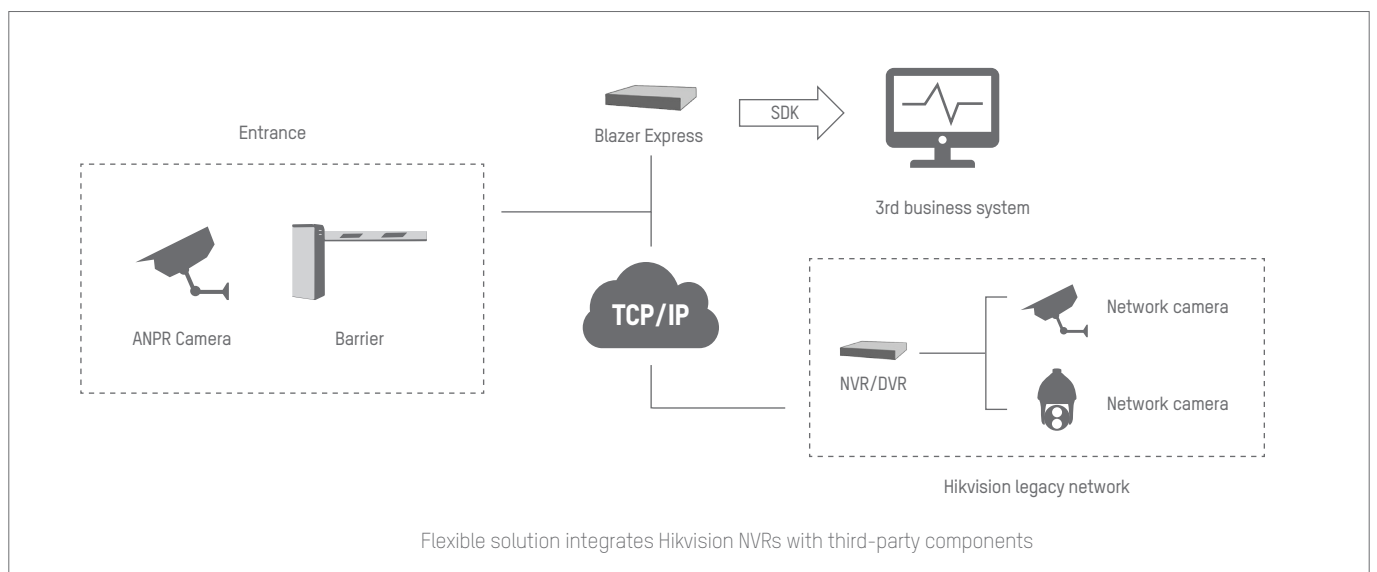

Easy alarm management interface with alarm type, relevant video, and location information on one screen

E-map provides situational awareness and easy identification

Flexible and Scalable

- Access Blazer Express via Control Client, Web Client, or Mobile Client
- Compatible with third-party cameras via ONVIF™ or private protocols
- Use an existing system to build a new, perfectly-tailored solution with a Hikvision NVR or DVR
- Open the SDK for third-party system integration and customized solution
